INTENDED USE
The qLabs® APTT liquid control is intended for use as a quality control whole blood to verify and monitor performance of the qLabs® APTT when handling laboratory reagents. It is recommended that two levels of the liquid control are used when performing quality control check.

WARNING AND PRECAUTIONS
1. For in vitro diagnostics use only. Do not take internally.
2. Carefully read instructions before use.

PREPARATION OF CONTROL MATERIALS
1. Gather all the required materials and have them ready to perform the control testing.
2. Remove the control vials from refrigerator and allow them to equilibrate to room temperature (18-25°C) before use. This equilibration process may take up to 30 minutes.
3. For APTT test strip instructions, refer to the APTT package insert.

PERFORMING QUALITY CONTROL TEST
1. Insert the test strip into the strip guide of the meter.
2. Select QC testing mode.
3. Enter an 8-digit numerical Strip Code as prompted by the meter.
Note: The 8-digit Strip Code entered into the meter should match the code on the vial label.
4. Confirm Strip Code which initiates the vial firmly over the edge of a table or our customer service at +86 755 86296766.
